

DELIVERING THE CERTAINTY OF MAXIMUM SAFETY AND PERFORMANCE

The Finest in Generator Exhaust Products

Only Schebler provides the highest-quality, custom-configured, built-to-order systems that maximize performance, efficiency, safety, and profitability while minimizing risk.

WITH SCHEBLER YOU GET:

CUSTOM ENGINEERING

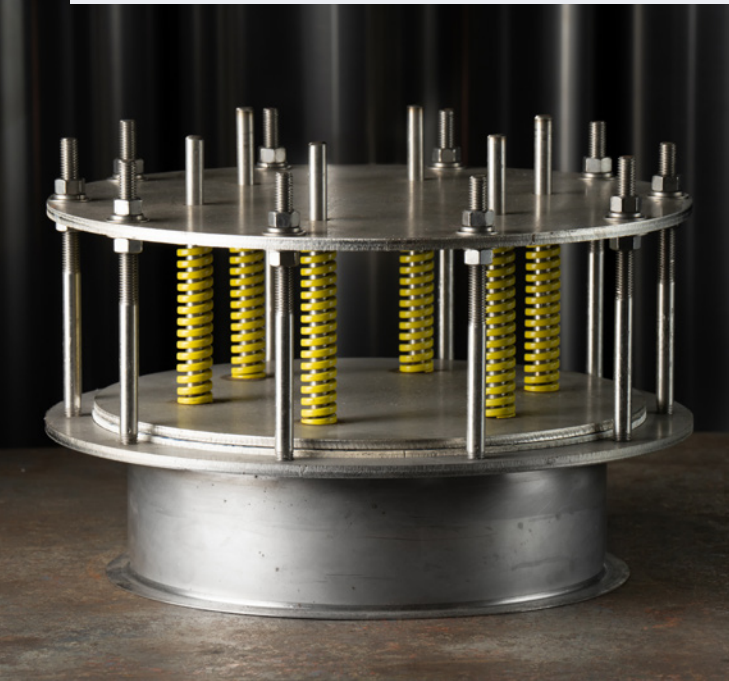

Our products are custom-made to your specific requirements and precise measurements. By ensuring every detail is accounted for, we provide smoother installation and more efficient products.

STEADFAST SUPPORT

We back each of our products with elite engineering services and exceptional technical support. We check and re-check all required specifications and incorporate the resources necessary to meet and exceed your expectations.

PREFABRICATED QUALITY

Our customers agree: prefabricated systems are more reliable and more affordable than field-fabricated ones. We oversee the manufacturing of every system produced in our U.S. factory, providing complete control to build stronger and more durable products.

Zero-leak Products for Generator Exhaust Systems

Our CPR Series is ideal for critical generator exhaust applications where the certainty of zero leakage is required. It's perfect for large facilities with multiple generators, providing maximum fire protection and occupant safety while minimizing installation space.

CPRP2 Featuring 2" of insulation

CPRP2A Featuring 2" of insulation and a 1" air gap

CPRP4 Featuring 4" of insulation

CPRSW Single-wall CPR exhaust product
