

GENERATOR EXHAUST

**ENSURED PERFORMANCE,
SAFETY AND RELIABILITY.**

**YOU DESERVE THE CERTAINTY OF
SCHEBLER-BUILT GENERATOR EXHAUSTS.**

THE CERTAINTY OF SCHEBLER

Every generator exhaust project is different, but the most successful have the same thing in common—they are backed by the certainty of Schebler.

Because only Schebler provides the highest quality, custom-configured, built-to-order systems that maximize performance, efficiency, safety and profitability while minimizing risk.

At Schebler, we focus relentlessly on helping our customers design and install systems that are driven by their specific needs, built with products that are guaranteed to perform as promised and backed by support that will always be there when they need it.

THE CERTAINTY OF PREFABRICATION

Prefabricated generator exhaust systems have emerged as the preferred choice over traditional field-welded assemblies. These systems offer significant advantages, including time savings, cost-effectiveness and enhanced safety when dealing with high temperatures and exhaust gas pressures.

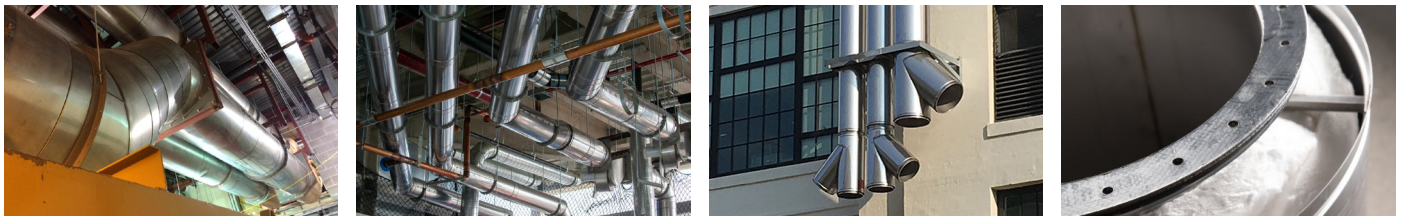

Unlike field-fabricated systems, which are typically made from sections of Schedule 40 carbon steel pipe on-site and subsequent insulation, our American-made prefabricated systems offer a streamlined insulation process. By utilizing a supervised factory environment, we ensure stringent quality control measures, providing you with the confidence of highly engineered and controlled manufacturing. As a result, we deliver the certainty of a reliable, top-performing product, meeting and exceeding expectations time after time.

THE CERTAINTY OF MAXIMUM SAFETY AND RELIABILITY

When it comes to the safety and total performance of generator exhaust systems, trust Schebler for reliable solutions.

Schebler generator exhaust systems are the epitome of safety and reliability. With one to four inches of insulation, our factory-fabricated systems offer fiber insulation to reduce cooling, maintain optimal temperatures and clearance to combustibles. When insulation isn't required, our flexible designs can also provide a one-inch air gap, ensuring we can always provide adaptable and optimized solutions.

UL Factory-Fabricated Products

UL 103 and UL 2561 factory-fabricated products are specifically designed for generator exhaust systems. They are made to meet rigorous standards and offer superior performance, with 1400° continuous operations and positive pressure rated for 60" WC.

NFPA 37 Standard

Your safety is our priority. Our technical experts meticulously design systems per NFPA 37, including essential components like pressure relief valves and thermal expansion bellows. You can count on us for product selection and meeting your safety requirements.

CPR Series

Our CPR series is where certainty meets innovation. With the unwavering assurance of zero-leakage, this series is ideal for:

- Medical facilities
- Data centers
- Mixed-use buildings
- Large generator systems

P Series

These UL listed, lightweight chimney products offer some of the industry's best features, such as low clearances, reduced footprints, lower initial costs and multiple insulation options. They are perfect for:

- Generator exhaust systems
- Building heating appliances
- Grease ducts

THE CERTAINTY OF STEADFAST SUPPORT

Since Schebler was founded in 1895, we have fabricated high-quality, innovative products designed and built with expert craftsmanship and backed by impeccable support.

In 2022, we initiated an ESOP (Employee Stock Ownership Plan) to give everyone at Schebler the certainty of ownership. Our ESOP also ensures our customers receive certainty of solid customer support from our highly motivated employee-owners.

OUR INDUSTRY-LEADING SUPPORT INCLUDES:

- Extended warranties.
- Fast turnaround times
- Made in America quality
- Uncompromising service from our team of dedicated employee-owners

FROM HOSPITALS TO HOTELS, AND EDUCATIONAL FACILITIES TO CONSTRUCTION OR REAL ESTATE SITES, QUALITY BUILDING HEATING APPLIANCE SYSTEMS MAKE A WORLD OF DIFFERENCE IN SAFETY AND AFFORDABILITY.
