

PREASSEMBLED COMPONENTS

THE CERTAINTY OF PREASSEMBLED COMPONENTS

**WHEN YOU NEED THE CERTAINTY OF QUALITY, CONSISTENCY
AND EASIER INSTALLATION, NOTHING MATCHES SCHEBLER'S
CUSTOMIZED, PREASSEMBLED FABRICATION SERVICES.**

DELIVERING THE CERTAINTY OF SCHEBLER PERFORMANCE

Preassembled sections from Schebler give you confidence in quality and performance. That's because each component is fabricated and joined in our manufacturing facility under the focused supervision of our quality control team. Plus, with each preassembled section, you save time and labor in the field—and the costs associated with them.

Only Schebler provides the highest quality, custom-configured, built-to-order systems that maximize efficiency, safety and profitability while minimizing risk.

THE TIME FOR SCHEBLER PREASSEMBLED SECTIONS

When sections are joined together in the field, you risk compromising their quality and sealing capabilities, which can pose a number of dangers, including fire and the premature release of unhealthy contaminants. Preassembling sections in our manufacturing center eliminates on-site welding any time you want to make your installation easier. It is especially ideal when you have any of the following:

- Hard-to-reach installation areas, such as in confined spaces or areas where hands-on work is limited
- Complex connections that involve non-standard pieces or require connections with no margin for error
- Multiple straight sections in a fitting

THE BENEFITS OF SCHEBLER PREASSEMBLY

With preassembled sections, you reduce on-site risk and on-site costs. You also get the following:

FASTER, EASIER INSTALLATION

With our preassembled sections, the installation crew simply needs to lift the sections and put them in place.

PROFESSIONAL QUALITY CONTROL

After fabrication at our manufacturing facility, we can perfectly line up pieces and ensure non-standard sections fit as expected.

MORE CUSTOMIZATION CHOICES

Choose paint colors, metal finishes, powder coating or cladding pieces for a perfect aesthetic building match.

PROFESSIONAL DELIVERY

We arrange for appropriate over-the-road transportation and can accommodate all unloading needs for cranes or a forklift.

NO-DAMAGE ASSURANCE

Custom blocking, cribbing, dunnage and/or bracing is used for each preassembled section to ensure the finished product will arrive at its destination intact and undamaged.

SCHEBLER SUPPORT

With our legendary Schebler service, we provide full support for on-site crews to ensure proper installation.

THE CERTAINTY OF SCHEBLER

With Schebler preassembled sections, our engineering team works with you from start to finish. We begin with your project need or the problem you are trying to solve so that we can design the best solution for your project.

Along the way, we provide proactive, consultative support to ensure your system will perform as expected and ships and installs easily. We take into account the environment where the system is being installed, appropriate measurements and requirements, necessary supports and the whole process of producing, shipping, unpacking and installing the product.

**MADE IN AMERICA BY A TEAM OF
DEDICATED EMPLOYEE-OWNERS**
