

SPECIAL GAS VENTING

**LONG-LASTING PERFORMANCE
AND UNCOMPROMISING DURABILITY.**

**YOU DESERVE THE CERTAINTY OF SCHEBLER
LEAK-FREE SPECIAL GAS VENTING.**

THE CERTAINTY OF SCHEBLER

Every special gas venting project is different, but the most successful have the same thing in common—they are backed by the certainty of Schebler.

Because only Schebler provides the highest quality, custom-configured, zero leakage, built-to-order systems that maximize performance, efficiency, safety and profitability while minimizing risk.

At Schebler, we focus relentlessly on helping our customers design and install systems that are driven by their specific needs, built with products that are guaranteed to perform as promised and backed by support that will always be there when they need it, including a 3-year leak-free guarantee.

THE CERTAINTY OF PEAK EFFICIENCY

We help ensure your building and appliances always perform at their best. Our special gas venting systems are designed to give you the certainty of consistent reliability.

Today's high-efficiency appliances are critical to your operations, but they also produce gallons of corrosive condensation and low-temperature exhaust. Our gas venting systems remove these gases safely, without leaking. It starts with our exhaustive pre-design work, including pressure drop calculations, and continues through our high-tech prefabrication production process.

With Schebler Factory-Built Special Gas Venting Systems, You Get:

SUPERIOR QUALITY CONTROL

FASTER AND EASIER INSTALLATION

LEAK-FREE GUARANTEE

UL 1738 LISTED PROTECTION

VERSATILITY—LABELED FOR POSITIVE, NEUTRAL AND NEGATIVE OPERATIONS

DURABILITY—CONSTRUCTED FROM AL 29-4C OR 316L STAINLESS STEEL

THE CERTAINTY OF PREFABRICATION

Schebler products are more durable, more consistent, and of a higher quality than field-fabricated ones.

Prefabricated special gas venting has become the established replacement for traditional field-welded assemblies due to its considerable time savings and cost-effective safety in handling high temperatures and exhaust gas pressures. By producing and building our products in our U.S. factory, Schebler gives you the certainty of highly engineered and controlled manufacturing to deliver reliable, top-performing products, every time.

Field-fabricated special gas venting systems, on the other hand, are typically made from sections of Schedule 40 carbon steel pipe, welded in the field, and then insulated. This complicates installation and does not provide the quality control inherent in Schebler's supervised factory environment.

THE CERTAINTY OF SELECTION

Each of our special gas venting systems is tested and proven for reliability and durability.

eVent® Series

These popular venting systems deliver guaranteed leak-free performance for high-efficiency appliances. They provide exceptional corrosion resistance and come with a lifetime warranty.

Sequence Draft Control®

Designed for high-efficiency appliances, our line of fully engineered venting systems lowers energy consumption and increases boiler life.

THE CERTAINTY OF STEADFAST SUPPORT

Since Schebler was founded in 1895, we have fabricated high-quality, innovative products designed and built with expert craftsmanship and backed by impeccable support.

In 2022, we initiated an ESOP (Employee Stock Ownership Plan) to give everyone at Schebler the certainty of ownership. Our ESOP also ensures our customers receive certainty of solid customer support from our highly motivated employee-owners.

OUR INDUSTRY-LEADING SUPPORT INCLUDES:

- Extended warranties
- Fast turnaround times
- Made-in-America quality
- Uncompromising service from our team of dedicated employee-owners
