

# DELIVERING CERTAINTY FOR COMBINED HEAT & POWER

## The Highest Performing Cogeneration Exhaust Products

Schebler brings certainty to combined heat and power (CHP) systems through cutting-edge venting solutions. Our cogeneration systems are designed for high-performing facilities producing power and heat on-site. They effectively manage high-temperature exhaust while streamlining installation and meeting strict industry standards. Our expertise ensures reliability at every stage, making CHP operations cleaner, safer and more cost-effective.

### THE CERTAINTY OF OPTIMIZED VENTING SOLUTIONS

Our meticulously engineered venting solutions optimize safety, efficiency and environmental compliance. Utilizing advanced materials and precise fabrication techniques, these prefabricated systems ensure proper performance under extreme thermal and pressure conditions to provide the ultimate in fire-resistant performance, space efficiency and adaptability.

### WITH SCHEBLER YOU GET:

#### THE CERTAINTY OF CUSTOM ENGINEERING

Our products are custom-made to your specific requirements and precise measurements.

#### THE CERTAINTY OF STEADFAST SUPPORT

We back each of our products with elite engineering services and technical support.

#### THE CERTAINTY OF PREFABRICATION

We oversee the manufacturing of every system produced in our U.S. factory to build stronger and more durable products.

## Generator Exhaust Systems Designed for Combined Heat & Power

Our generator exhaust systems ensure impeccable safety while maintaining minimal spatial profiles.

### CPR SERIES

The ideal line for critical generator exhaust applications where the certainty of zero leakage is required, our popular CPR series provides maximum fire protection while minimizing installation space. Constructed from robust materials engineered for thermal stability and corrosion resistance, these products address the challenges of thermal expansion and mechanical stress inherent in CHP operations. Each delivers optimized airflow, enhanced durability and strict compliance with regulatory standards. UL listings include UL 103 and UL 2561.

**CPRP4** Featuring 4" of insulation.

**CPRP2A** Featuring 2" of insulation and a 1" air gap.

**CPRP2** Featuring 2" of insulation.

**CPRSW** Single-wall bolt-together exhaust product.
