

DELIVERING CERTAINTY FOR EDUCATIONAL FACILITIES

Our Advanced Venting Systems Get an A+ in Performance

Safety is paramount for educational facilities. Schebler's advanced venting systems are designed to meet their unique demands, prioritizing dependability, efficiency and durability. We ensure that facilities provide secure environments for students, staff and faculty.

Schebler's advanced venting systems are engineered to deliver:

- Healthy air quality
- Fire protection and leakproof certainty
- Compliance with strict building codes
- Streamlined installation
- Long-term reliability

WITH SCHEBLER, YOU GET THE CERTAINTY OF:

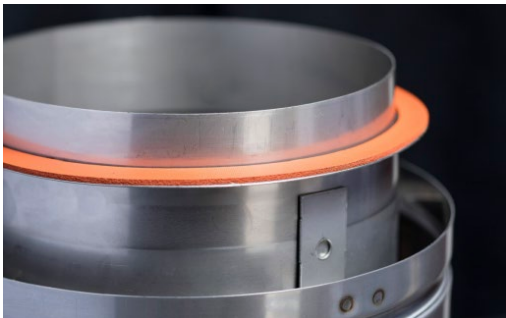

CUSTOM ENGINEERING

STEADFAST SUPPORT

PREFABRICATION

The Certainty of Comprehensive Protection

Our solutions manage high-temperature exhaust from boilers, commercial kitchens and backup generators, ensuring fire protection and leak-free certainty. With a commitment to quality and adaptability, we're a trusted partner in enhancing the performance and safety of educational infrastructure.

eVent® Series

These modular vent and exhaust systems are ideal for venting high-efficiency appliances that require a positive, neutral or negative draft exhaust. UL listings include UL 1738 and ULC S636-95.

P Series

These UL listed, lightweight chimney products offer low clearances, lower initial costs and multiple insulation options. UL listings include UL 103 and UL 2561.

FyreGuard®

These grease ducts increase usable space with zero clearance while improving fire safety. They are ideal for school cafeterias and spaces that require cooking or grilling venting. UL listings include UL 1978 and UL 2221 Classified.

SlimVent®

The industry's only obround-shaped grease duct, SlimVent® reduces overhead space compared to a round duct. Its UL listings include UL 1978 and UL 2221 Classified.

Sequence Draft Control®

This engineered venting system is designed to meet today's high-efficiency boiler and hot water heater exhaust venting requirements.
