

# DELIVERING CERTAINTY FOR HEALTHCARE

## Chimney and Exhaust Systems That Promote Healthy Environments

Schebler’s venting solutions are engineered to support the critical operations of hospitals, medical centers and other healthcare facilities. These customized systems provide fire protection and leak-free performance while handling intense heat from medical equipment, commercial kitchens, boilers, backup generators and large-scale laundry rooms.

- Engineered for reliability and durability, reducing maintenance needs
- Safeguards staff and patients from potential hazards
- Ensures compliance with industry standards
- Streamlines installation, minimizing disruptions

### WITH SCHEBLER, YOU GET THE CERTAINTY OF:

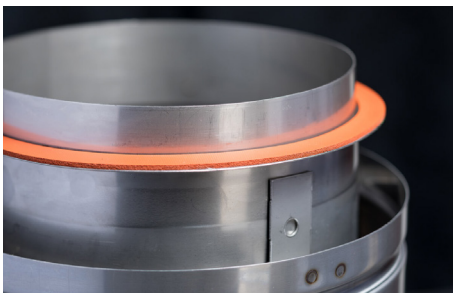

**CUSTOM ENGINEERING**

**STEADFAST SUPPORT**

**PREFABRICATION**

### The Certainty of Tailored Solutions

Each Schebler system is custom-engineered to provide reliable performance, even in high-temperature environments, without compromising on safety or efficiency. With a strong focus on long-term sustainability, Schebler’s venting systems support the ongoing functionality of healthcare facilities, enhancing air quality and ensuring compliance with strict industry standards.

#### eVent® Series

These modular vent and exhaust systems are ideal for venting high-efficiency appliances that require a positive, neutral or negative draft exhaust. UL listings include UL 1738 and ULC S636-95.

#### P Series

These UL listed, lightweight chimney products offer low clearances, lower initial costs and multiple insulation options. UL listings include UL 103 and UL 2561.

#### CPR Series

The ideal line for critical generator exhaust applications where the certainty of zero leakage is required. The CPR series provides maximum fire protection while minimizing installation space. UL listings include UL 103 and UL 2561.

#### FyreGuard®

These grease ducts increase usable space with zero clearance while improving fire safety. They are ideal for spaces that require hot-temperature venting, such as for cooking or grilling. UL listings include UL 1978 and UL 2221 Classified.

#### SlimVent®

The industry’s only obround-shaped grease duct, SlimVent® reduces overhead space compared to a round duct. Its UL listings include UL 1978 and UL 2221 Classified.

#### Sequence Draft Control®

This engineered venting system is designed to meet today’s high-efficiency boiler and hot water heater exhaust venting requirements.
