

DELIVERING CERTAINTY FOR HOSPITALITY

Durable, Safe and Customized Venting Products

Schebler delivers the certainty of innovation with venting solutions tailored to hotels, restaurants, resorts and entertainment venues. We engineer our systems to handle high-temperature exhaust demands for all large-scale facilities with a wide range of needs, such as for guest rooms, kitchens, industrial laundry operations and backup generators. Schebler's solutions:

- Ensure optimal fire safety, energy efficiency and system reliability
- Support comfortable, secure environments for guests and staff
- Meet rigorous hospitality operational needs
- Adhere to strict industry standards

THE CERTAINTY OF HIGH-PERFORMING VENTING SOLUTIONS

The only thing more important than the comfort of your guests and staff is their safety. Schebler delivers both. With a focus on durability, performance and leak-free operation, Schebler's products help facilities maintain clean, safe air while minimizing maintenance and downtime. With our commitment to sustainability, safety and efficiency, we create comfortable, environmentally conscious spaces for guests and staff.

WITH SCHEBLER, YOU GET THE CERTAINTY OF:

CUSTOM ENGINEERING

STEADFAST SUPPORT

PREFABRICATION

Customized Venting Systems Designed for Hospitality

We design our factory-fabricated systems to handle the demanding exhaust needs of hospitality spaces — including generator exhaust systems, grease ducts, special gas venting products and building heating appliances — while ensuring compliance with safety standards.

eVent® Series

These modular vent and exhaust systems are ideal for venting high-efficiency appliances that require a positive, neutral or negative draft exhaust. UL listings include UL 1738 and ULC S636-95.

SlimVent®

The industry's only obround-shaped grease duct, SlimVent® reduces overhead space compared to a round duct. Its UL listings include UL 1978 and UL 2221 Classified.

FyreGuard®

These grease ducts increase usable space with zero clearance while improving fire safety. They are ideal for spaces requiring hot-temperature venting, such as for cooking or grilling. UL listings include UL 1978 and UL 2221 Classified.

CPR Series

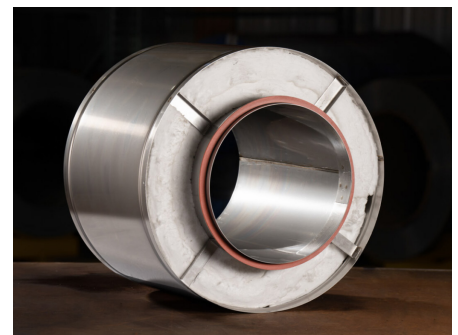

The ideal line for critical exhaust system applications where the certainty of zero leakage is required. The CPR series provides maximum fire protection while minimizing installation space. UL listings include UL 103 and UL 2561.

P Series

These UL listed, lightweight chimney products offer low clearances, lower initial costs and multiple insulation options. UL listings include UL 103 and UL 2561.

Sequence Draft Control®

This engineered venting system is designed to meet today's high-efficiency boiler and hot water heater exhaust venting requirements.
