

DELIVERING CERTAINTY FOR REAL ESTATE AND CONSTRUCTION

Supporting Safe, Sustainable and Code-Compliant Spaces

Schebler supports the real estate and construction industry with UL listed venting products designed for safety and performance. Our systems are engineered to enhance energy efficiency and streamline installation, providing zero-leakage certainty for residential projects, high rises and mixed-use developments.

- Flexible, cost-effective solutions
- Provides excellent fire protection
- Ideal for both new builds and renovations
- Built to manage high-temperature exhaust with minimal maintenance

WITH SCHEBLER, YOU GET THE CERTAINTY OF:

CUSTOM ENGINEERING

STEADFAST SUPPORT

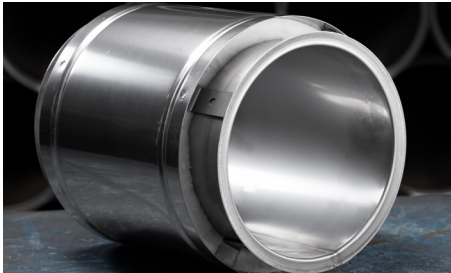

PREFABRICATION

The Certainty of High-Performing Venting Systems

Engineered for durability and precision, our venting systems are ideal for applications such as student housing, senior living and apartment complexes. We not only have a reputation for delivering flexible, cost-effective solutions but for meeting the highest industry standards.

Designed for Real Estate and Construction Projects

Our factory-fabricated venting systems meet the unique demands of modern construction projects, empowering developers to create safer, more sustainable spaces.

eVent® Series

These modular vent and exhaust systems are ideal for venting high-efficiency appliances that require a positive, neutral or negative draft exhaust. UL listings include UL 1738 and ULC S636-95.

P Series

These UL listed, lightweight chimney products offer low clearances, lower initial costs and multiple insulation options. UL listings include UL 103 and UL 2561.

CPR Series

The ideal line for critical exhaust system applications where the certainty of zero leakage is required. The CPR series provides maximum fire protection while minimizing installation space. UL listings include UL 103 and UL 2561.

FyreGuard®

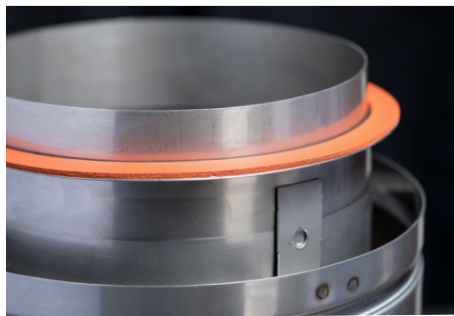

These grease ducts increase usable space with zero clearance while improving fire safety. They are ideal for spaces requiring high-temperature venting, such as for cooking or grilling. UL listings include UL 1978 and UL 2221 Classified.

SlimVent®

The industry's only obround-shaped grease duct, SlimVent reduces overhead space compared to a round duct. Its UL listings include UL 1978 and UL 2221 Classified.

Sequence Draft Control®

This engineered venting system is designed to meet today's high-efficiency boiler and hot water heater exhaust venting requirements.
