

**GREASE DUCTS**

**UNMATCHED RELIABILITY,  
SAFETY AND PERFORMANCE.**

**YOU DESERVE THE CERTAINTY OF SCHEBLER  
FACTORY-BUILT GREASE DUCTS.**

# THE CERTAINTY OF SCHEBLER

Every grease duct project is different, but the most successful have the same thing in common—they are backed by the certainty of Schebler.

Because only Schebler provides the highest quality, custom-configured, built-to-order systems that maximize performance, efficiency, safety and profitability while minimizing risk.

At Schebler, we focus relentlessly on helping our customers design and install systems that are driven by their specific needs, built with products that are guaranteed to perform as promised, and backed by support that will always be there when they need it.

## THE CERTAINTY OF PREFABRICATION

**Factory-built grease duct solutions are more affordable, more consistent and can be designed at a higher quality than field-fabricated ones.**

Field fabrication can add considerable on-site costs while introducing unnecessary quality risks. On the other hand, by prefabricating our products in our U.S. factory, Schebler ensures stronger-built, longer-lasting products that will meet your specific needs.

**With Schebler Factory-built Grease Ducts, You Get:**

---

**SUPERIOR QUALITY CONTROL**

---

---

**FASTER AND EASIER INSTALLATION**

---

---

**LOWER ON-SITE COSTS**

---

**UL LISTED PROTECTION**

---

---

**MODULAR DESIGN**

---

---

**MEETS ALL STANDARDS AND CODES, INCLUDING NFPA, IMC AND UMC**

# THE CERTAINTY OF INNOVATION

## Schebler grease ducts feature a first-of-its-kind gasket connection.

We've replaced the traditional sealant with a unique flange-to-flange, factory-applied gasket design with an inner collar. By standardizing the joint connection, Schebler gaskets eliminate the possibility of improperly sealed joints while providing high quality, enhanced safety, lower costs and **UL 1978 listed** fire protection.

## THE CERTAINTY OF SELECTION

Each grease duct system is tested and proven for reliability and durability. Plus, all grease duct products use Schebler's RapidLock® system, a unique one-piece band for joining chimney sections, reducing installation time and expense.

### P Series

Available with a variety of different clearances depending on the insulation level, P Series products deliver exceptional quality while increasing the usable square footage in buildings.

### SlimVent®

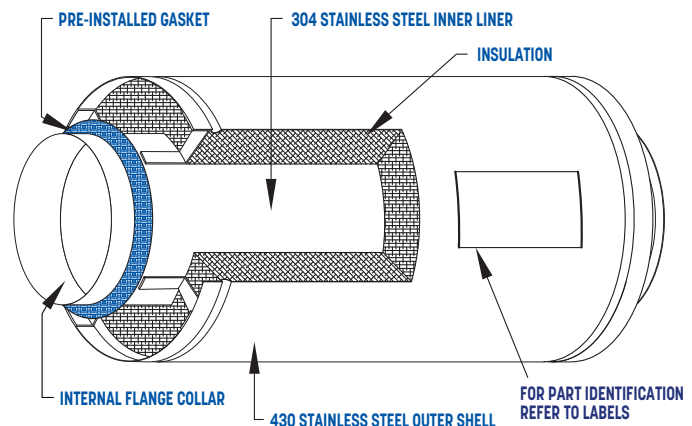

Our patented, **UL 2221 classified**, obround-shaped grease duct significantly reduces the required floor and overhead space while providing prefabricated quality.

### FyreGuard®

These round, **UL 2221 classified**, zero-clearance grease ducts increase usable floor space while improving fire safety while eliminating the need for a fire-rated chase. No field welding or secondary installation is required.

### FyreGuard®3

These ETL listed grease ducts deliver the same benefits as our FyreGuard products but with one less inch of insulation.

## THE CERTAINTY OF STEADFAST SUPPORT

**Since Schebler was founded in 1895, we have fabricated high-quality, innovative products designed and built with expert craftsmanship and backed by impeccable support.**

In 2022, we initiated an ESOP (Employee Stock Ownership Plan) to give everyone at Schebler the certainty of ownership. Our ESOP also ensures our customers receive certainty of solid customer support from our highly motivated employee-owners.

### OUR INDUSTRY-LEADING SUPPORT INCLUDES:

- Extended warranties.
- Fast turnaround times
- Made in America quality
- Uncompromising service from our team of dedicated employee-owners
